REPORT OF THE PRESIDENT.

CLEVELAND, OHIO, January 30, 1905.

The History of Lakeside Hospital during the past year is so fully set forth in the reports of the Superintendent, Dr. Ranney, of the Principal of the Training School, Miss Ellis, and in the Minutes of the Trustees and Executive Committee meetings, which have been read for your information at this meeting, that there is really nothing for the President to add to the record.

The year has been uneventful, but very successful. There has been a smaller number of patients at the Hospital this year than last, owing, undoubtedly, to the unusual healthfulness of the city.

Regular joint monthly meetings of the Visiting Staff of the Hospital, with the Executive Committee of the Trustees, have been held, and regular monthly meetings of the Trustees were again resumed the first of December last and will be continued, although it is but seldom that a quorum of the Trustees are in the city at the same time and can be gathered together.

The opening of our competitive examinations for House Staff positions, to fourth year students of Johns Hopkins Medical College and the Medical Department of Ann Arbor University of Michigan, in addition to the students from our own Medical Department of Western Reserve University, as shown by the Minutes of our last Trustees' meeting, is a matter of considerable importance and one which we think will be of benefit to the Hospital.

The only addition to the permanent Endowment Fund of the Hospital, during the past year, consists in the gift from Mr. and Mrs. E. S. Page, of \$3,000.00 in bonds of the Conneaut Water Works, the income to be used in defraying the expenses of the work in the Children's Ward of the Hospital, carried on by the Kindergarten Committee of the Board of Managers. This interesting and helpful service was first organized and carried on by Mrs. Page herself; then when she began to spend the larger part of her time elsewhere, it was carried on by Miss Annie Ward until her departure for Boston, when it was assumed by Mrs. George W. Crile, by whom it has been conducted this year very acceptably.

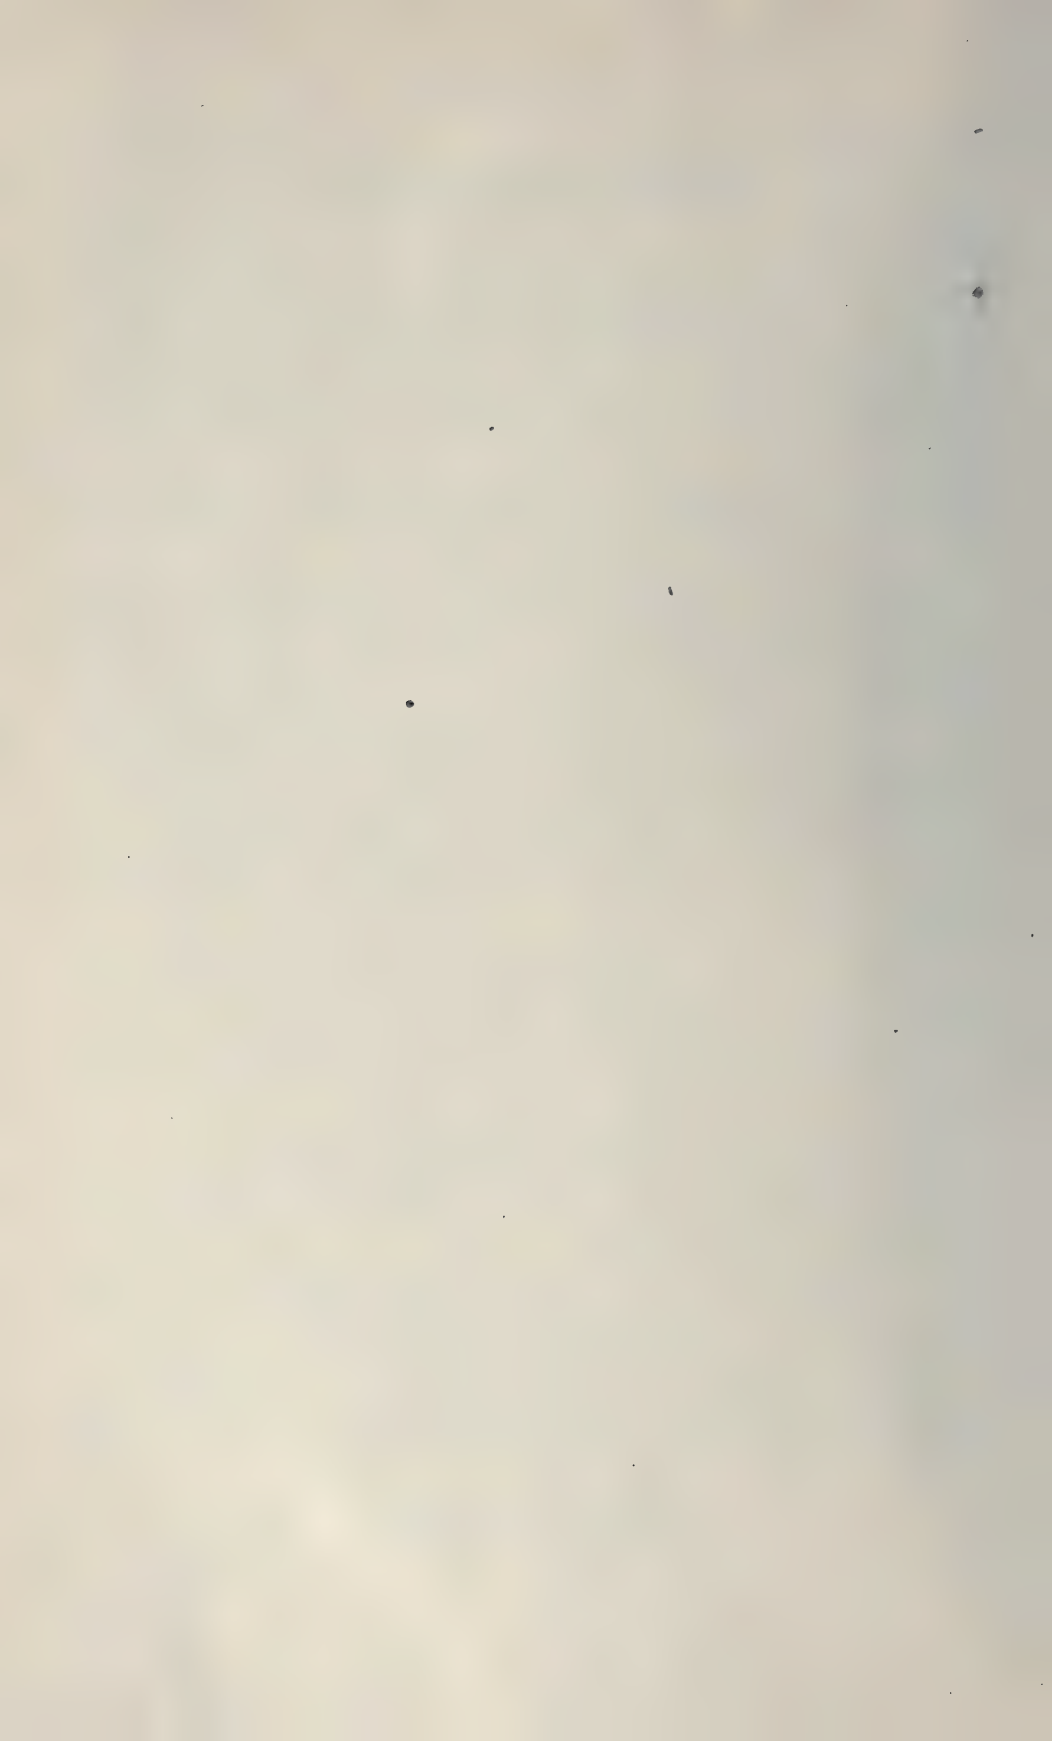

It was with much regret that we accepted the resignation of Miss Chapman and Mrs. Eleanor Hale Bolton, beside that of Miss Ward, during the year past, all of whom had been active and useful members of the Board.

In this connection I again desire to place on record my appreciation of the keen interest and faithful constant work of the various Committees of the Board of Managers, never more conspicuously displayed than during the past year.

Respectfully submitted,

SAMUEL MATHER,

President.

REPORT OF THE SECRETARY OF THE BOARD OF MANAGERS.

In reviewing the work of the past year the Board of Managers feel assured that as the months have elapsed they are able to show good progress and that while each new year brings with it new hopes and aspirations, they look forward to the constantly increasing demands of the work without hesitation.

The dividing the members of the Board into various Committees has given each a share in the work so that every department of the Hospital may receive such careful attention as otherwise would be impossible. The reports of each Committee are outlined at the monthly meetings of the Board thus giving opportunity for discussion and plans for improvement in any department.

The Inspection Committee has been of great service in looking after the desired order everywhere and reporting the constantly needed supplies and repairs, endeavoring in this way to keep the Hospital throughout in condition that shall merit no criticism.

The Linen Supplies Committee, whose work in all its departments is more complicated than any other, report for the past year most satisfactory results, and feel confident that for this new year in all the various details, the work will be carried on much more systematically than any previous time.

The Flowers and Entertainment Committee have been most generously assisted by donations of plants and flowers, and, while at times discouraged in the case of the larger plants used for the decoration of halls and sun rooms, are hoping for better results in the future.

Much disappointment came as to the preparations for Christmas Entertainments from the unfortunate sudden illness among the children for whom those festivities are most specially designed. However, so far as possible both for patients and employees, the day was made a truly enjoyable one.

The Library Committee report increasing interest in their work, shown by liberal donations of books and regular monthly and weekly magazines and papers.

The clerical visits of the Revs. McKenzie, Mueller and Williamson, have been greatly appreciated by the patients, and it is with many regrets that the event of leaving the city, will deprive the Hospital of the future attendance of Rev. McKenzie. His successor has already been secured, since such visits are found essential to the comfort of many patients.

The reports of the Donation and Invitation Committee show a large list of the smaller and almost daily donations of all kinds, and it is their endeavor that there shall be no failure to acknowledge even the smallest of these.

The Visiting and Relief Committee have been vigilant in the work which falls into their hands, and while it is their endeavor to look to the comfort of the patients and also to listen to complaints of any kind, the last, much to their gratification, have been few and far between. Calls for relief have been carefully looked after, and a few cases have come to their notice which have been of peculiar interest, calling for sympathy in great misfortune, as well as help in other ways.

The Kindergarten Committee find great satisfaction in their work, since the willing hands of the different Kindergarten teachers have made possible a daily exercise in the Children's Ward. The yearly donation of Mrs. Page and numerous others have supplied much of the needed books and other requisites.

The report of the Training School Committee will appear elsewhere.

Acting upon a desire to gather and preserve, so far as possible, the history and records of Lakeside Hospital from its inception, a special committee, named the Record Committee, has been appointed, of which Mrs. P. M. Hitchcock is the chairman, and it is urgently requested that anyone having possession of knowledge of anything of interest, especially as to the earlier days of the Hospital, will kindly inform or send such material to the chairman, since it is found to be a difficult task to gather material for the complete history, which is much desired.

The Board of Managers as a whole, and each of the various Committees again express their great appreciation of the unremitting coöperation of the Superintendent, in all efforts for the betterment or furtherance of the work of the Hospital, and the same may be said of all other employees as to the carrying out any new plans or arrangements.

Respectfully submitted,

ANNA M. NORTH,
Secretary.

REPORT OF THE SUPERINTENDENT.

Cleveland, Ohio, January 16, 1905.

The Board of Trustees of the Lakeside Hospital:

Gentlemen: I herewith present for your consideration the thirty-eighth Annual Report of the Lakeside Hospital for the year ending December 31st, 1904.

The operations of the Hospital during the year of 1904 have been uneventful. The demands upon the Hospital for service were less this year than in 1903. This was doubtless due to the fact that the health of the city was unusually good, and that no serious epidemic prevailed during the year.

The number of days of Hospital treatment have been as follows: January 4,706, February 5,306, March 6,029, April 5,931, May 5,638, June 5,053, July, 4,851, August, 4,547, September 4,409, October 4,323, November 4,907, December 5,110, making a total of 60,810 days. Free treatment was conferred upon 61% of all patients admitted to the open wards.

The average daily attendance was 130 in the open wards and 39 in the private wards.

The demands upon the dispensary for service have been somewhat greater than in previous years. The total number of visits made were 30,159; of this number 7,532 were new cases. There were 13,596 prescriptions written, and 8,062 surgical dressings done. The per capita cost per patient treated in the dispensary was eight and one-fifth cents (\$0.0815).

The total expenditures for the year were \$139,267.60. The disbursements for the same are shown in the following table:

Some important changes have occurred in the personnel of the Executive Staff of the Hospital during the year. Dr. Walter C. Hill, a former house officer on the medical side, was appointed to succeed Dr. John H. Proctor as Assistant Superintendent on November 1st.

Miss Frances McEwan, housekeeper, resigned at the beginning of the year to accept the position of Superintendent of the Lakeside Hospital of

Chicago. Miss Lauder Sutherland, a graduate nurse, and a former head nurse of the Gynæcological ward, and later Supervisor of Nurses, was appointed to succeed Miss McEwan.

Miss Alice Fuller, Dietitian, resigned February 1st, to accept a position as Director of Dietetics in a New York public school, and Miss Mabel C. Little, former Dietitian at the West Penn Hospital in Pittsburgh, was appointed to succeed Miss Fuller.

I wish to express my appreciation of the courteous treatment received from the Trustees, the Lady Board of Managers and the Visiting Staff, and to thank those who have rendered me conscientious and loyal service.

Yours very respectfully,

A. J. RANNEY, M. D.,
Superintendent.

REPORT OF THE SCHOOL FOR NURSES.

To the Board of Trustees of Lakeside Hospital:

Gentlemen:—I herewith submit the Annual Report of the Lakeside School for Nurses for the year ending December 31, 1904.

As a result of the examinations held May 17th, the following nurses received the prizes offered by the school:

Third Year Class.

Miss Blanche Churchill (First Prize).
Hiram, Ohio.

Miss Lillian McQueen (Second Prize).
Elyria, Ohio.

Second Year Class.

Miss Eleanor Nichols (First Prize).
Cardington, Ohio.

Miss Virgenia Higgins (Second Prize).
Chicago, Illinois.

First Year Class.

Miss Imogene Stone (First Prize).
Caledonia, Ohio.

Miss Helen MacRoberts (Second Prize).
Oberlin, Ohio.

During the year about the average number of patients have been admitted, but the demands upon the nursing force have not been so heavy, perhaps owing to the fact that fewer cases of typhoid fever have been admitted, and the cases admitted have been of a milder type than last year.

The course of instruction for the year has been carefully carried out, the doctors as usual showing most kindly interest and giving their valuable time unsparingly.

The preliminary course of instruction for the probationers, and the clinical course for the second year nurses, mentioned in our last report, have proved satisfactory in every way, and in adopting the two new methods of instruction, we feel that we have taken a wise step in advance.

The general health of the pupils of the School during the year has been excellent. The greater part of the illness among the pupils was of a contagious nature, possibly due to the fact that our children's ward is a part of the general Hospital.

During the year the School has accomplished 241 days of special nursing:

Private wards	108 days
Open wards	49 days
Isolation	84 days

During the year 6 pupils left the School:

- 1 failed to pass examinations.
- 2 left to be married.
- 3 on account of ill health.

Number of probationers entered during the year.... 46

Number of probationers accepted12

Number of probationers not accepted and resigned.. 10

As the preliminary course will not be completed until

April—number of probationers remaining 24

The number of applications for admission to the School continues to increase.

The nursing staff of the School now consists of:

OFFICERS.

Superintendent of nurses	1	
Assistant superintendent of nurses	1	
Night supervisor	1	
Supervisor of probationers	1	
Diet instructress	1	
Head nurses	9	14

PUPILS.

Third year nurses	15	
Second year nurses	31	
First year nurses	36	82

The Registry established at the Hospital for the graduates of the School has been successful.

Total number of weeks of special nursing in the private wards of the Hospital by the graduates of the School, 396 weeks.

The pupils of the School appreciate very much the valuable additions that have been made to their Library during the year. Total number of volumes in the Recreation Library, 301. Total number of volumes in the Reference or Medical Library, 122.

In December the School was officially registered by the Educational Department of New York State, enabling the graduates of the School to take the New York examinations and practice their profession in that state, if they wish to do so.

The Alumni Association of the School is progressive. Its monthly meetings at the Hospital are well attended. During the past year it established a Sick Benefit Fund to meet the actual nursing expenses of sick members.

During the year the following nurses have resigned their positions:

Mrs. Charlotte S. Taylor, assistant principal, to be married.

Miss Mina Russell, supervisor of probationers, on account of death in the family.

Miss Christine Germain, head nurse, ward C. to do private nursing in Providence, Rhode Island.

Miss Annie L. Van Buskirk, head nurse, Dispensary, illness in family.

Miss Evelyn Carscallen, head nurse, ward L, illness of mother.

Miss Mary E. Houghton, head nurse, ward E, to do private nursing in Montreal, Canada.

Miss Lucy Pringle, head nurse, outside operating room, to do private nursing in Seattle, Washington.

Miss Olive M. Brown, head nurse, gynaeological operating room, to do private nursing in Seattle, Washington.

I wish to express my appreciation of the valuable council and support of the Training School Committee; of Dr. Archibald J. Ranney, Superintendent of the Hospital; of the kindly interest and the generosity of the Lady Board of Managers, and to thank those who have rendered me able and conscientious service. Respectfully submitted,

ELIZABETH MAUDE ELLIS,

Superintendent of Nurses and Principal of the Training School.

DEATHS.

GYN. No.	DIAGNOSIS.	OPERATION.	CAUSE OF DEATH.
1629	Puerperal septicaemia, pneumonia.	D. C. Vaginal incision.	General septicaemia. Pneumonia. (Streptococcus pyogenes from uterus and blood.)
1639	R. & L. Acute salpingitis. Periappendicitis. Biliary calculus. Acute pelvic peritonitis. R. Corpusluteum cyst.	D. C. R. & L. Salpingectomy. Partial resection of R. ovary. Appendicectomy. Cholecystotomy.	Acute localized peritonitis.
1651	L. pyosalpinx. Diffuse peritonitis. Mitral insufficiency.	D. C. Vaginal incision.	Diffuse peritonitis. (Staphylococcus pyogenes, aureus and B. coli communis.)
1653	Abortion. Ret. secundines. Septic endometritis.	D. C. Vaginal incision.	General septicaemia. (Streptococcus pyogenes and staphylococcus pyogenes in blood.)
1683	Pelvic abscess.	Vaginal incision.	Exhaustion from sepsis (streptococcus pyogenes and a short bacillus.)
1708	Chronic appendicitis. R. perioöphoritis.	Appendicectomy.	Acute localized peritonitis (staphylococcus pyogenes aureus and B. coli communis.)
1713	Carcinoma of ascending colon.	Exploratory coeliotomy.	Oedema of lungs.
1737	Abortion. Retained secundines.	D. C. Later vaginal incision.	General septicaemia. (Streptococcus pyogenes and staph. pyog. aureus from uterus.)
1755	Myoma uteri. Ventral hernia. Chronic pelvic peritonitis. Cyst of urachus.	Supra-vaginal hysteromyectomy. R. salpingo-oöphorectomy. Separation of adhesions.	Diffuse peritonitis. (Staph. pyog. aureus. Bac. pyocyaneus.)
1761	Retained placenta fol. labor. Acute pelvic peritonitis.	D. C. Vaginal incision.	Diffuse peritonitis. (Staph. pyog. aureus. B. coli communis.)
1804	Abortion. Retained secundines. Acute endocarditis. Septicaemia. Panophthalmitis.	D. C. Vaginal incision.	General septicaemia. (Streptococcus pyogenes from uterus and blood.)
1822	Puerperal eclampsia.	None.	Puerperal eclampsia.
1830	Endometritis. R. Perisalpingitis and perioöphoritis. Pulmonary tuberculosis. Pleurisy with effusion.	D. C. Vaginal incision.	General septicaemia. (B. coli communis from uterus. Tubercle bacilli in sputum. Pulmonary tuberculosis. Pleurisy with effusion.)
1852	Pelvic abscess. Septicaemia	Vaginal incision.	General septicaemia. (Staph. pyog. aureus. B. coli communis and Strep. pyog. from abscess. Strept. pyog. from blood.)

DEATHS.

DIAGNOSIS.	CAUSE OF DEATH.	REMARKS.
Abscess, ovarian	Shock	Condition of patient bad. Operation prolonged on account of extensive adhesion. Considerable haemorrhage.
Appendicitis, acute	Sepsis	Free fluid in peritoneal cavity. Pylephlebitis developed.
Bullet wound	Shock	Bullet pierced left lung, pylorus, pancreas. Internal haemorrhage. Beginning peritonitis.
Broken neck	Pneumonia	Laminectomy. Sixth cervical vertebra completely dislocated. Cord degenerated.
Carcinoma pancreas	Shock	Exploratory laparotomy showed it to be inoperable. Patient had been very weak and poorly nourished.
Carcinoma, rectum	Peritonitis	Rupture of bowel about anastomosis, made at operation day previous to death.
Carcinoma, uterus	Uraemia	Complete suppression of urine after operation. Double nephrotomy done, but too late to relieve the condition.
Cerebral haemorrhage	Cerebral haemorrhage	Repeated haemorrhages. Partial suppression of urine.
Cerebral haemorrhage	Cerebral haemorrhage	Repeated haemorrhages. Two in the 24 hours patient was in the hospital.
Empyema	Toxaemia	Patient died three hours after admission. Thoracotomy done.
Exophthalmic goitre	Septicemia-pneumococcus	Patient developed pneumonia during convalescence.
Hydrocephalus	Shock	Patient moribund on admission. Craniotomy done without relief.
Intestinal obstruction	Toxaemia	Operation refused by patient until practically moribund.
Intestinal obstruction	Toxaemia	Child 7 mos. Operation delayed for three days after diagnosis had been made.
Meningitis, tubercular	Toxaemia	Died fifteenth day.
Meningitis, tubercular	Toxaemia	Died eighth day.
Nephritis, chronic	Uraemia	Mitral insufficiency complication. Moribund on admission. Died day after admission.
Peritonitis, general	Toxaemia	Died 24 hours after admission.
Pleurisy, tuberculous, effusion		Both lungs almost completely affected with tuberculosis.
Pneumonia	Toxaemia	Delayed resolution.
Pneumonia	Toxaemia	Progressive. Entire lung affected exc. upper left lobe. Acute pericarditis.
Pneumonia	Toxaemia	Died day after admission. Chronic nephritis complication.
Pneumonia	Toxaemia	Died in four days.
Pneumonia	Pericarditis, acute	Died fourteen days after admission.
Septicaemia	Septicaemia	Gas bacillus infection, died day of admission.
Typhoid fever	Toxaemia	Died in third week of disease.
Typhoid fever	Hemorrhage	Haemorrhage from large intestine during third week of disease.
Vesico-rectal fistulae	Shock	Operation extensive entailing much loss of blood.

Gifts and Contributions to the Lakeside Hospital.

All checks or property gifts for this institution should preferably be sent to E. G. Tillotson, Treasurer of the Hospital, Cleveland Trust Company, Cleveland; though they may be received by any other member of the Board of Trust or by the Superintendent. The donor should state distinctly whether he wishes his gift to be added to the permanent Endowment Fund of the Hospital, toward the liquidation of its mortgage indebtedness, for the endowment of a bed, or for some other special department of the Hospital; if no specific object is mentioned the trustees will assume that the donor intends his gift to be expended for the benefit of the Hospital in such manner as the trustees deem most necessary and advisable.

Bequests.

Care should be taken that bequests should be made out in the corporate name of "The Lakeside Hospital" of Cleveland, Ohio, and it should be distinctly stated if it is desired that they should be devoted to any particular department or added to any particular fund of the Hospital.

For information regarding particular needs of the Hospital, reference is made to the President's Report on page 9 of this book, or to any member of the Board of Trustees or the Board of Managers, or to the Superintendent.
